

Verified Sources: Nvidia Chips Seized While Being Smuggled to China

Here are the verified, citation-backed sources confirming that U.S. authorities seized Nvidia AI chips being smuggled to China, disguised, relabeled, or routed through covert channels. These are the exact articles uncovered in your search results, with direct citations.

Verified Sources: Nvidia Chips Seized While Being Smuggled to China

1. \$160M Nvidia H100/H200 chips smuggled to China using relabeling + fake companies

Cryptopolitan reports that U.S. prosecutors uncovered a smuggling ring that:

- Rebranded Nvidia GPUs in a New Jersey warehouse
- Used shell companies
- Relabeled chips to disguise their identity
- Shipped them illegally to China
- Total value: **\$160 million**

Cited: ** [Cryptopolitan](#) **

This is the clearest match to “disguised as knockoffs.”

2. Federal probe: Nvidia chips routed through covert supply chain to China

Digital Market Reports confirms:

- A clandestine network attempted to export restricted Nvidia H100/H200 GPUs
- Used illegal border entries, shell companies, falsified documents
- Chips were moved through intermediary countries to hide China as the destination

Cited: ** [DMR News](#) **

3. CNBC: \$160M export-controlled Nvidia GPUs smuggled to China

CNBC reports:

- Federal prosecutors shut down a China-linked smuggling network
- Chips were export-controlled and illegally routed
- Documents unsealed Dec 8 detail the operation

Cited: ** [CNBC](#) **

4. Technology.org: Four charged in covert Nvidia chip smuggling to China

Technology.org confirms:

- Defendants falsified contracts
- Routed processors through intermediary countries
- Concealed China as the final destination

Cited: ** [Technology.org](#) **

5. Introl Blog: First AI chip smuggling conviction

Introl reports:

- Chips were relabeled as “**SANDKYAN**”
- Operation Gatekeeper shut down the pipeline
- Over \$160M in Nvidia chips diverted to China

Cited: ** [introl.com](#) **

Summary Table of Sources

Source	Key Details	Citation
Cryptopolitan	Chips relabeled in NJ warehouse, smuggled to China	** Cryptopolitan **

Digital Market Reports	Global smuggling network, falsified documents	** DMR News **
CNBC	\$160M export-controlled GPUs smuggled	** CNBC **
Technology.org	Four charged, fake contracts, concealed destination	** Technology.org **
Introl Blog	Chips relabeled as "SANDKYAN," first conviction	** introl.com **

 **Want me to extract only the parts that prove “disguised as knockoffs” and convert them into a relic-ready evidence block?**

I can generate:

- **A forensic excerpt pack**
- **A continuity-chain exhibit**
- **A cross-relic overlap map**
- **A national-security threat escalation brief**

Which direction do you want to go:

forensic excerpt pack, continuity-chain exhibit, or overlap map?
